WHO WE ARE

DaklaPack Group is an international organization with offices in The Netherlands, Germany, France, Belgium, Great Britain, Denmark and China. DaklaPack established in 1975 offers a wide range of packaging and supporting logistics. Our products range from simple envelopes to specially customised packaging solutions. We also offer additional services from filling and packaging of your products through to logistics and fulfillment.

SERVICES

DaklaPack Group can take your supply and value chain out of your hands. From the initial concept phase to the logistical handling and delivery to your customers, it is for you to decide which stages you would like us to handle, giving you enough time to focus on what you do best. You can benefit from any of the below solutions:

DaklaPack Group Innovation

DaklaPack Group Sourcing

DaklaPack Group Production

DaklaPack Group Filling

DaklaPack Group Order Handling

DaklaPack Group Fulfilment

DaklaPack Group Warehousing

DaklaPack Group E-commerce

INNOVATIVE AND COMPREHENSIVE

DaklaPack Group supports a number of companies and organisations in the design and development of innovative packaging. We emphasise on achieving the highest quality of service and delivering the best solution for your business. We have a strong ecommerce presence which makes ordering easier for our customers. With a forever expanding client base of over 11,000, all of whom benefit from our quality of service, advice and professionalism.

What ever the material, size, function or application DaklaPack will be able to create exactly what your business and product requires. We can also print on to any tailor-made products using recognised printing methods, our print quality is unrivalled and is often complimented upon by our customer.

ADDITIONAL SERVICES

Besides our extensive range of quality packaging, DaklaPack offers 4 additional services:

- filling service using state of the art machinery
- tablet counters, batching machines
- full project promotional mail outs
- inkjet systems and high volume printers
(colour and black-white)

With our large production team we are able to handle large quantities within a short lead time.

SOURCING

Daklapack have been actively producing packaging since 1975. Our customers not only ask us to develop and package their products, but even to manufacture the product itself. Under the direction of our European management we develop, produce, package and distribute in large quantities of products in China and other countries. We supply numerous premium products, plain and printed to our clients. Our daily activities are order processing and distribution. All our processing is handled from our warehouse in Lelystad (The Netherlands). Daklapack has the capacity to store up to 5.000 pallets.

For tailor-made and handling orders transport costs will be dependant on volume.

For up to date pricing please visit www.daklapack.com

ADDITIONAL SERVICES

HANDLING

Besides the large range of re-closable packaging. DaklaPack specialises in handling, filling and distribution. Our team of experienced workers can within short notice handle large quantities in a short time frame. Through manual and machine operated handling we can assist large and start up business's, we will even handle the smallest of orders.

An overview of our additional services:

FILLING AND PACKAGING

Manual and machine operated filling and packaging of Foods, fluids, powders, tablets and more. We have available; filling machines, tablet counters, dispensers, various sealers, inkjet and high volume printers.

ASSEMBLING

The assembly of your products following your instructions. Through means of inkjet printing direct on to the packaging with addresses, lot numbers, expiry dates etc. In addition we can offer variable date printing on to brochures letters and labels. Printing, folding, inserting and sending of all personalised content.

STOCK MANAGEMENT

Stock holding of your products, order picking, packing and dispatch to mainland or overseas.

CLINICAL TRIALS

The reliability of your research results depend on the care and how the material is transported, and the time that elapses between sending and arrival at the laboratory. The quality of the patients material is dependent on many factors and has a direct impact on the quality of your research.

Daklapack is your reliable partner in every stage of your clinical trial:

- Invitation
- Response processing
- Compilation of medical testing kits
- Takes responsibility for UN-approved packaging
- Sending of diagnostic samples

Medical Services

- Manual and machine automated packing of foods, fluids, powders and tablets
- Filling and packing of medical products in clean room
- Gamma Sterilization
- Direct printing of address's, lot numbers, expiry dates etc. by means of inkjet printing on to the packaging
- Stock management, order picking, packing and shipping to mainland and overseas

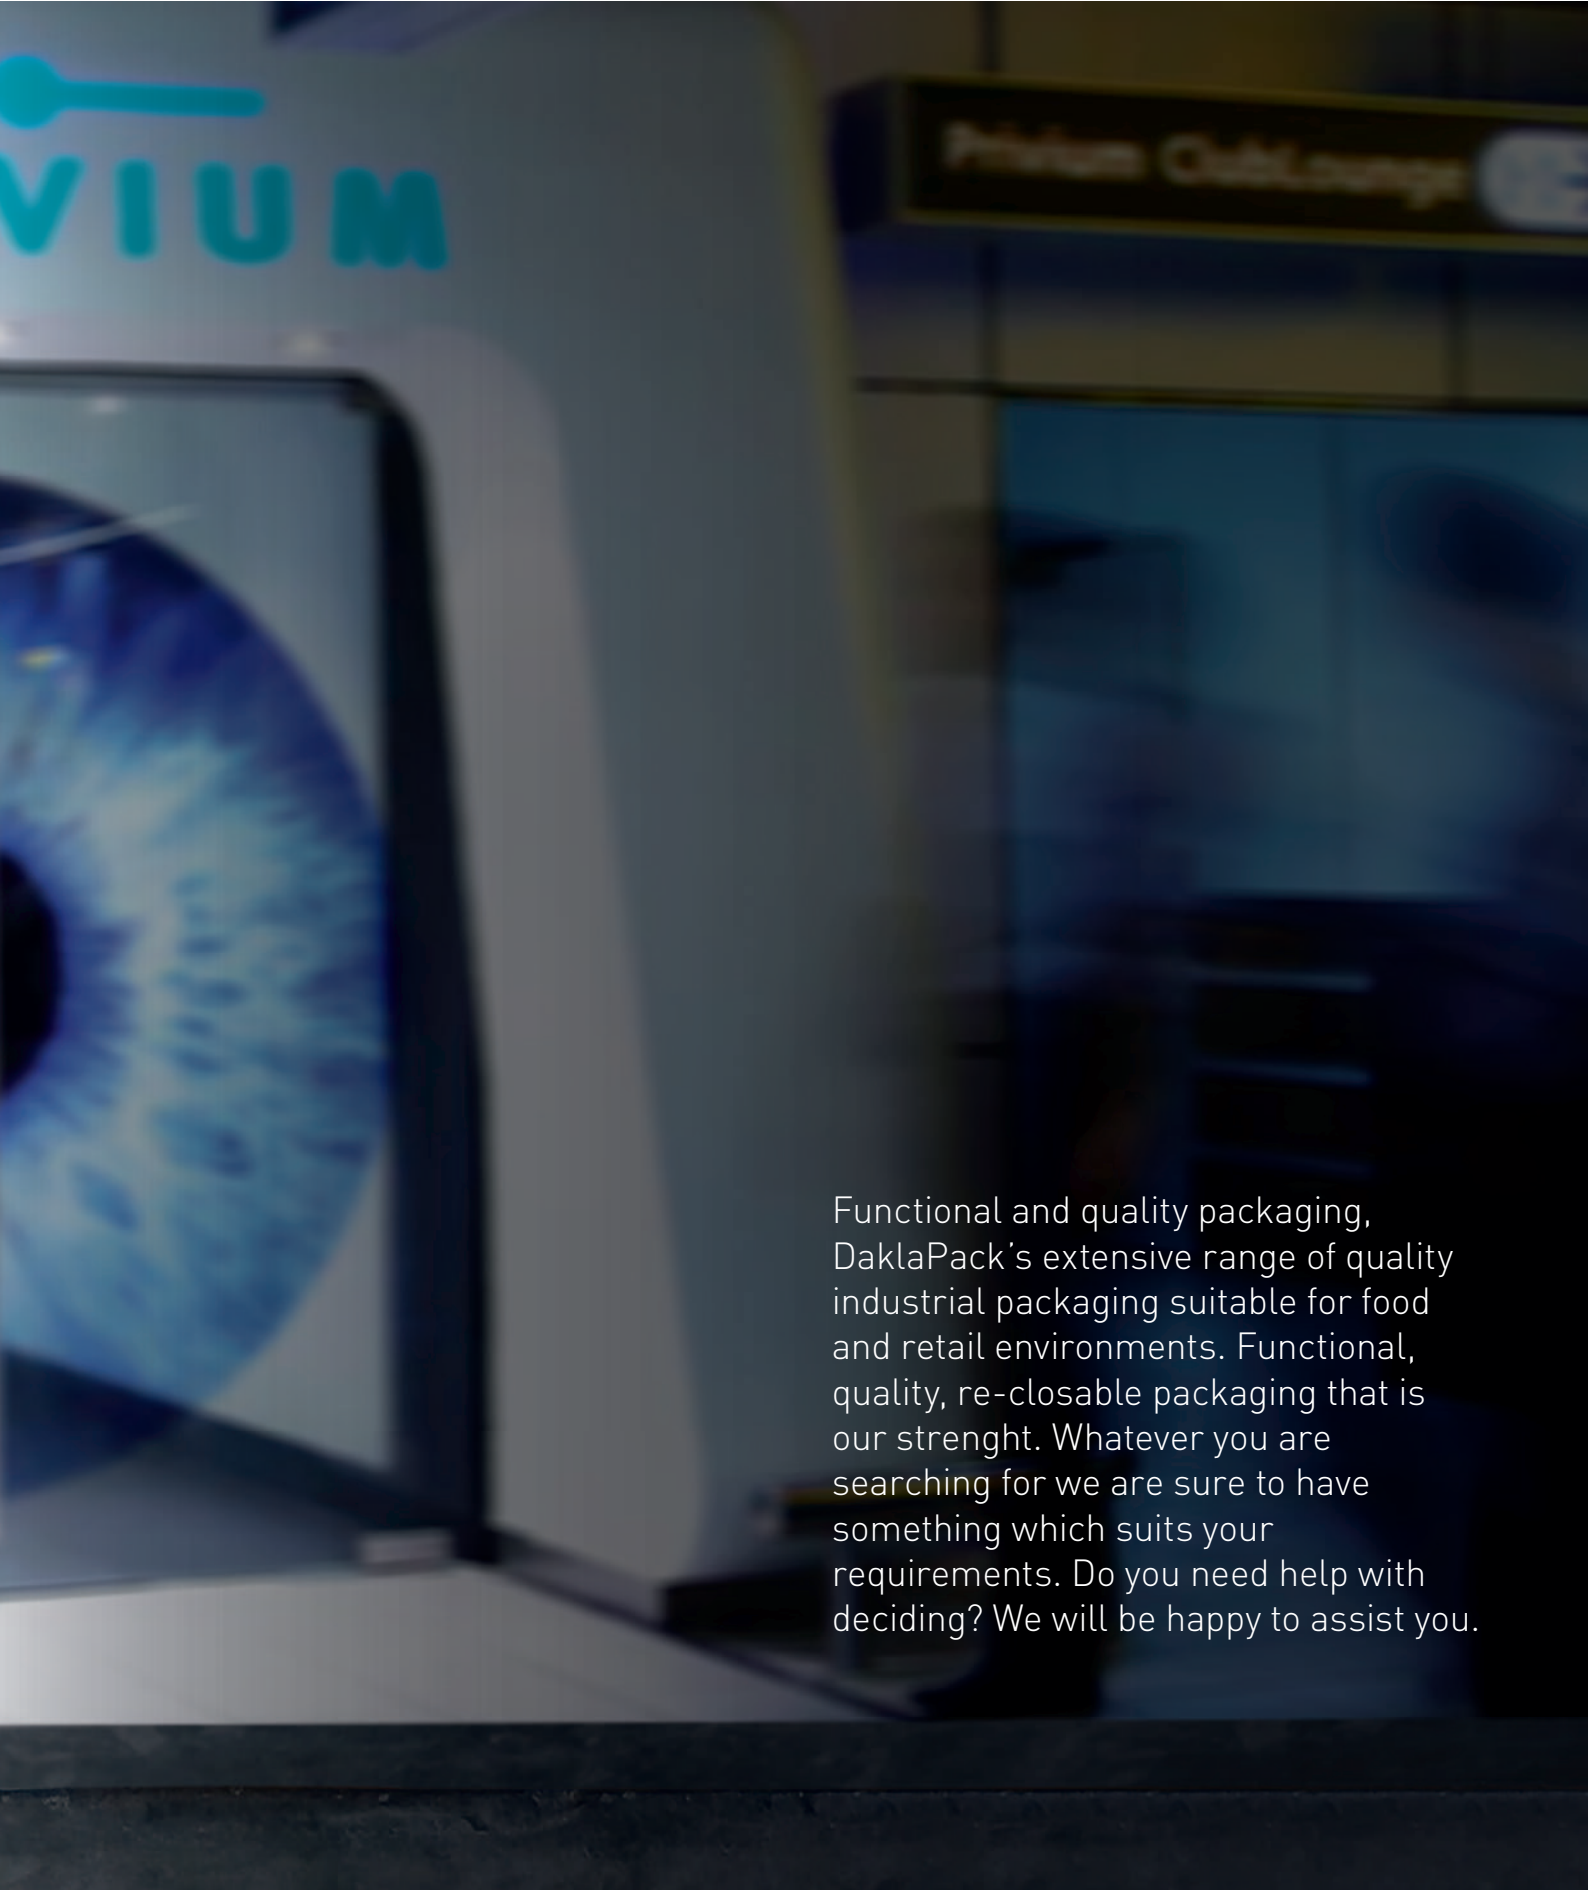

FSSC 22000 and SKAL

Certified system FSSC 22000 (HACCP) and SKAL (biological).

INDUSTRIAL PACKAGING

FUNCTIONAL AND QUALITY PACKAGING

VIUM

Functional and quality packaging, DaklaPack's extensive range of quality industrial packaging suitable for food and retail environments. Functional, quality, re-closable packaging that is our strength. Whatever you are searching for we are sure to have something which suits your requirements. Do you need help with deciding? We will be happy to assist you.

GRIPBAGS

PROVEN GRIP CLOSURE

Our versatile high quality gripbags which can be open and re-sealed hundreds of times. The strong material ensures de gripbag will offer great protection to the contents as well as being able to survive some pretty tough treatment itself. The gripbags are strong as well as being light weight and moisture resistant.

APPLICATIONS

You can use gripbags for a lot of packaging solutions. Of course as a 'normal' packaging, but also to present or send jewellery, textiles, stationery, user guides, spare parts, spices, medicines, herbs etc. Gripbags are also used for sending of leaflets, catalogues, magazines, price lists and information material.

MATERIAL

Our Gripbags are made from 50 micron Polyethylene. We can also make them in 60, 70 and 90 micron.

SPECIFICATIONS

All Gripbags have a hanghole. Dimensions are internal dimensions.

PRINTING

The Gripbags are easy to print and value for money, as well in Pantone colour numbers as in full colour. Quantities are interesting as well: you can order a 1 colour print up from 1,000 pcs!

DİŞ HEKİMLERİYLE GELİŞTİRİLEN,
DİŞ HEKİMLERİNCE TAVSİYE EDİLEN

SLIDERGRIP XL CONCEPTS TAILOR MADE

These Slidergrip bags made specifically for XL-Concepts are equipped with a plastic easy to open slider on the top of the bag and were produced in 2 designs both in Polish and Turkish language.

The front of the bag has 100% printed coverage and contains a small pocket whilst the rear is only partly printed giving some transparency to view the contents.

One of the requirements was that the contents of the bag not be visible, we therefore produced a number of samples in order to decide the amount of transparency required, full production resumed after approval from our customer.

Printing was completed using our rotogravure printing machinery, which offers high resolution printing between the layers which will protect the print from external influences. XL Concepts Slidergrip bag is used mainly for various types of dental products for example toothbrushes, toothpaste, toothpicks etc.

**THIS PRODUCT HAS BEEN MADE SPECIALLY TO ORDER.
WE ARE HAPPY TO HELP YOU TO DEVELOP NEW PACKAGING OR THE PRODUCT ITSELF.

PRIV

Schiphol

PRIVIUM

PRIVIUM SCHIPHOL TAILOR MADE

The flight safetybag is a re-sealable transparent bag for storing and transporting liquids in luggage. Liquids, gels and aerosoles can only in small quantities (100 ml per unit) be carried on to passenger airlines within the European Union.

We have made exclusively for our customer Schiphol Privium this bespoke custom sized flight safetybag which due to its transparent foil means that items can be packaged as per the guidelines.

COLOURBAG

SPECIALLY DEVELOPED FOR A REMARKABLE DISPATCH

The colourbags are a great way to sort group and store those easy to lose items, made in a number of bright colours and from a strong durable LDPE material ensure you can always find exactly what you are looking for and rest assured the contents will not have escaped. Due to the non transparent material used, the contents will also not be visible, handy should you not want people to see what is inside. The colourbags are also waterproof and come complete with a re-sealable grip closure which can be opened and closed hundreds of times.

APPLICATIONS

Colourbags can be used for many purposes, particularly for mailings, samples, sorting, grouping and storing of small items.

MATERIAL

Our Colourbags are made out of 70 micron Polyethylene.

SPECIFICATIONS

Supplied as standard with a hanging hole and re-sealable grip closure.

PRINTING

From a modest minimum order quantity we can create a colourbag exactly to your specifications, even with a print.

SNAZZYCOOLER

THE "COOLER" COOLER

The Snazzycooler is the successful and popular Snazzybubble in the form of a bottle. It keeps liquids cool or warm whilst offering additional protection to the bottle itself. Ideally suited as gift packaging or for shipping. The Snazzycooler can be printed in small print runs in one or two colours and is available in 3 different formats.

APPLICATIONS

The Snazzycooler is perfectly suited for keeping wines and champagnes cool, or a drink warm. Giving a bottle of Wine or Champagne away as a gift? What better way to send it than in a Snazzycooler.

MATERIAL

Made from a well insulated bubble foil.

SPECIFICATIONS

Punched handhole.

PRINTING

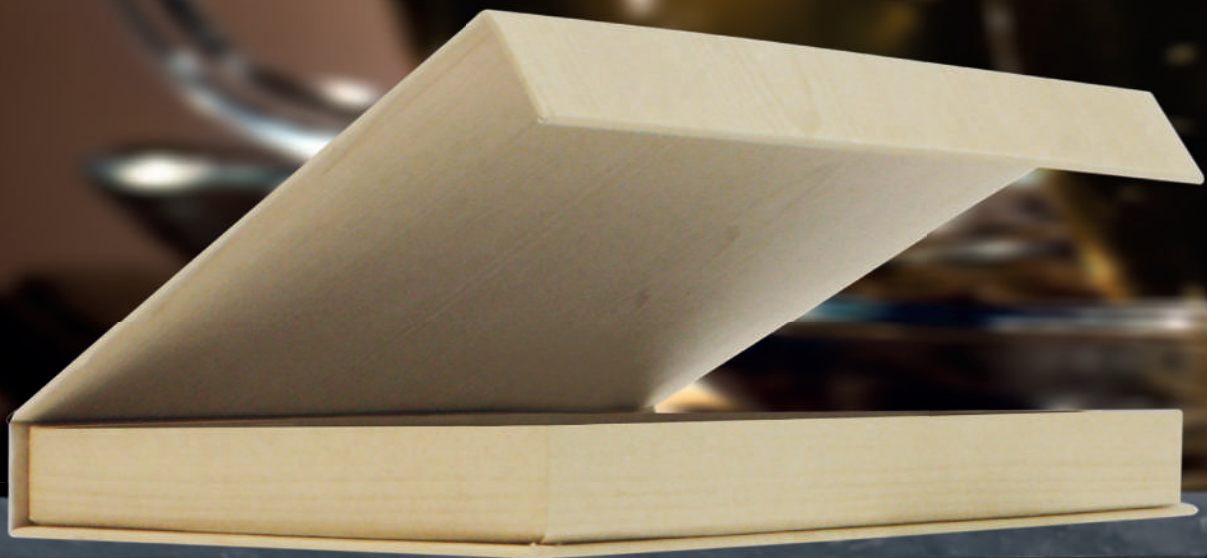

It is possible to customize the SnazzyCooler with your design. Contact us for further information.

LAMINATED PACKAGING

HIGH BARRIER LAMINATE

The high barrier laminated packaging from DaklaPack, whether it be for food, drink or pharmaceutical use we are sure to have something suitable in our range. DaklaPack's Laminated packaging is also often used for sending samples of products and materials to laboratories for testing. The laminated packaging from DaklaPack is particularly suitable for products which demand packaging with high barrier properties offering protection against air and light influences, offering a longer shelf life and a well preserved product.

SEEDBAG

WELL PROTECTED FROM EXTERNAL ELEMENTS

High barrier packaging perfectly suited for protecting your product from light and moisture. The Seedbag is intended for single use and can be easily sealed using our DaklaSealer. With an aluminium layer protecting against moisture and light exposure and a white paper exterior perfect for your product label or print.

APPLICATIONS

SeedBags are suitable for packaging seeds, samples of sweets, tea and coffee and other foods.

MATERIAL

Made from a balance combination of paper / Aluminium / Polyethylene.

SPECIFICATIONS

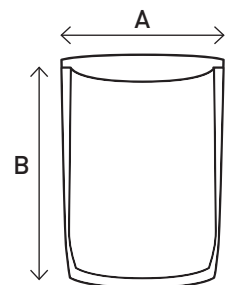

Opening on the short side. Dimensions are internal.

PRINTING

It is possible to customize the Seedbags with your design, please contact us for further information.

LAMI POUCH

SEALABLE STAND UP POUCH

Just like our Lamizip pouch just without the header and grip closure. Our Lamipouch is intended for use as a one time use pouch for food and even non food products. The pouch is designed with an opening bottom gusset which means the pouch will stand up on its own. Solids, liquids or powders can all be store in these pouches and easily sealed closed using a heat sealer. Made from a very high quality laminated foil which offer extremely high barrier properties. Available in many different sizes and available off the shelf.

APPLICATIONS

Perfectly suited for almost any solids, liquid or powder, easily sealed with our DaklaSealer table top sealer.

KÉBOL TAILOR MADE

Kebol are a large organization specialized at importing and worldwide export of plant bulbs, in order to increase brand awareness and stand out from the crowd Kebol required packaging which was a little different than those typically offered. Our solution a laminated stand up pouch with printing between the layers offering extra protection to the print during transport and on displays. The pouch can also be displayed using traditional methods and also on shelf ends as the packaging is able to stand freely.

A euro hole was punched into the header of the pouch in order to display on traditional stands, 7 ventilation holes are also punched into the pouch to ensure the bulbs remain dry and free from mold.

ADVENTURE FOOD TAILOR MADE

Together with Adventure food the market leaders in expedition instant foods. DaklaPack developed a stand up pouch for use in the outdoor and survival world.

The pouch is pre filled with a fresh dry food mixture which once hot water is added transforms into a delicious nutritional meal. As the pouch will be filled with boiling water it was required that the pouch be suitable for such a temperature, the meal can also be consumed from the pouch itself resulting in less carrying weight. Pouches are available in portions for one or two people.

Food Supplement

GIGAS TAILOR MADE

Food supplement company Gigas nutrition who developed and distribute performance supplements and muscle gainers whilst also providing advise to athletes and gym enthusiast. DaklaPack were approached by Gigas and were given the task to offer an alternate solution to there 5 kg tubs. The traditional tubs were expensive to transport and were often damaged during transport. Our pouches were the ideal solution being flat packed the pouches were cheaper to transport and due to there flexible nature, resist damage during transport. The pouches also stand out from crowd due to the design and offer a handy carrying handle.

SPOUTBAGS

STAND UP POUCHES FOR LIQUIDS WITH HIGH BARRIER PROPERTIES

These spouted pouches are made from a high quality laminated material which offers high barrier properties, combined with a dispensing spout and matching cap with tamper evident seal. Suitable for most liquid applications, drinks, concentrates, cleaning solutions etc. Due to the way the pouches are supplied (flat in boxes) they take up minimum amounts of space when compared to PET or glass meaning a huge saving during transit. Once the pouches are filled they can easily be sorted into boxes or retail display cartons. All are supplied with a sturdy bottom ensuring they will not fall over. Available in aluminium or transparent in low quantities.

**TRANSPARENT
106XLR SPOUT**

APPLICATIONS

Suitable for most liquid applications, drinks, concentrates, cleaning solutions etc.

FILLING

Filling the pouches with your product is also possible. Please contact us for further information.

7 Kg

LUNE DE MIEL TAILOR MADE

French giants and household brand name Lune de Miel offered DaklaPack the opportunity to produce for them a unique method of packaging and dispensing their honey product.

The requirements were for the packaging to hold 1kg of product, use less material than alternate solutions, have a unique method of dispensing the product and be able to stand freely on its own. DaklaPacks offering was a PET/PE laminated packaging which offered optimal barrier properties to retain flavor and increase shelf life. The corner sealed spout with dispensing membrane ensured that dispensing was quick and easy with the addition of keeping the packaging clean.

The high barrier laminated foil included a 9 colour rotogravure print, which included a transparent window where the customer could easily see the product inside.

The top of the pouch was left open so our customer could easily condition the packaging and fill using existing machinery.

Are you looking for a Spouted Pouch with similar properties. Then please contact us and one of our agents can assist you further.

SPOUTBAGS ON RAIL

FILLING YOUR PRODUCTS FAST AND EASILY

In addition to our standard range of Spoutbags, we have the possibility to produce tailor made pouches, supplied on rails with end clips, allowing you to fill larger quantities effortlessly. The Spoutbags on rail system also allows machine operators to enter multiple pouches into the filling machine without having to manually handle each and every pouch, so the operator can focus on the actual filling process instead of manual insertion. Our Spoutbags on rail system (including caps) integrates flawlessly with existing filling machinery currently available in the market. The pouches are suitable for pasteurisation and sterilisation as well as being suitable for both Food and Non-Food applications.

APPLICATIONS

Spoutbags on rail are most suitable for liquid foods and concentrates. Due to the lightness and flexibility of the foil this product is easy to carry with you.

FILLING

Filling the pouches with your product is also possible. Please contact us for further information.

SPECIFICATIONS

Internal dimension diameter spout : 8,6 mm

Permeability : high barrier laminate

Dimensions are : width x height up to closure + bottom (A x B + C)

Railsystem: 52 pieces on a rail

MATERIAL

PET / ALU / PA / RCPP (suitable for pasteurisation and sterilisation)

INSTANTANÉ

BANANIA TAILOR MADE

DaklaPack had the opportunity to work together with the French market leading chocolate powder producer “Banania”.

Along with the specifications in order to keep the product fresh DaklaPack were also faced with the challenge of creating a bespoke packaging which would be both unique in this particular market sector but also to be creative and easy to use. The spouted pouch consists of a laminated material which consists of PET and LDPE plastics which offers an optimal barrier for the contents of the packing also allows the contents to be clearly visible and a handy easy to use spout which is situated in the top corner of the pouch, allowing the customer to dispense the product accurately. The easy screw on cap ensures the product remains fresh. Filling the pouch with product at time of production takes place through the open top of the pouch, once filled the pouch can easily be sealed closed by using only means of heat.

The design takes full advantage of DaklaPacks 9 colour rotogravure printer which is printed between the layers. This particular pouch contains 450g of product, which took up much less shelf space when compared to previous solutions.

JAMES TAILOR MADE

A flexible and 100% recyclable was the wish of our customer James who develop a first aid kit for stains on rugs and carpets.

The set consists of various tubes with different concentrates of stain removers. The product is so impressive that it deserved to be presented in a professional way. The flexible and re-sealable wallet with full colour print couldn't be resisted by James and made an immediate replacement for the old laminated cardboard box which wasn't recyclable. The wallet also is water resistant which meant storing even in a damp place is also a possibility.

A black garment, possibly a t-shirt, is centered in the frame. It features a white square logo with the text 'LIFE' in a large, bold, sans-serif font. Below 'LIFE' is the text 'DESIGNED WITH' in a smaller, all-caps sans-serif font, and at the bottom of the logo is 'SISSY-BOY' in a stylized, handwritten font. The background is a textured wall with a mix of white, grey, and brown tones, suggesting a stone or concrete surface. A person's arm in a dark blue sleeve is visible on the right side of the frame.

LIFE

DESIGNED WITH

SISSY-BOY

SISSY-BOY TAILOR MADE

Sissyboy made use of our Matte Snazzybag envelope for the mailing of catalogues to customers. Our Matte Snazzybag envelope is made from a matt laminated foil which offers a chic look and feel. The seals of the envelope are around 6 mm wide resulting in a strong envelope certainly more than suitable for letter post.

Sissyboy also took advantage of our hot foil print service (MiniPrint) which makes the brand identifiable by the recipient.

TOPTAC

THE LIGHTWEIGHT PLASTIC ENVELOPE AS CLEAR AS GLASS.

The TopTac envelopes are a lightweight, crystal-clear envelope so you can see the contents in all their glory! TopTac envelopes are therefore immediately far more than just a cover that protects the contents. TopTac gives you the greatest possible assurance that your message will be both seen and read. TopTac literally gives extra impact and transparency to your mailing! Even better you can save considerable amounts of money on postage costs due to the light weight design TopTac envelopes are extremely strong and fitted with an easy to use peel and seal strip. The contents will always be kept dry as TopTac envelopes will withstand the rain. Self-adhesive labels stick to the TopTac envelope perfectly.

APPLICATIONS

Ideally suited for sending promotional material, local papers, brochures and catalogues.

MATERIAL

The standard TopTac envelopes are made from a 40 micron thick polyethylene, Also available in Polypropylene with a thickness of 45 micron and also the thicker 70 micron variant.

SPECIFICATIONS

The TopTac envelopes are easy to seal simply by removing the backing to the peel and seal strip located on the flap.

PRINTING

It is also possible to print on to the TopTac envelopes contact us for a quotation.

ANWB TAILOR MADE

In addition to the online webshop ANWB have multiple collection points for pre-ordered products. Together with the ANWB we have created an environmentally and customer friendly piece of postal packaging which can also be used when collecting products directly from the collection points.

Based upon our standard Coverplus envelope a coextruded strong plastic envelope with tamper evident seal and opaque plastic. With the addition of the handle hole this is easy for customers to carry away from the collection centers. The flap of the envelope contains two tamper evident strips and a perforation line. Should the goods need to be returned then the contents can easily be put back inside and sealed for a second time.

Printed in full CMYK with the addition of a Pantone house colour.

PHOTOPROTEC

PROTECT YOUR HARD COPIES FROM UNAUTHORISED COPYIN

Daklapack has a unique solution against illegal copying of photos which are sent to customers or clients for review. With the specially designed Photoprotec packaging you can prevent your photos being scanned and copied which results in a loss of income. The bold lines on the packaging will ensure the scan or copy will be useless. The packaging is sealed in such a way that you will immediately see if it has been tampered with. Photos or designs for review from now on can be protected against illegal copying.

APPLICATIONS

Photoprotec is the number 1 solution for photographers, school photographers and other professional photographers who are sending copyright materials for review.

MATERIAL

The Photoprotec is made from a crystal clear 40 micron Polypropylene.

SPECIFICATIONS

Flap containing a destructive peel and seal strip. Therefore offering a tamper evident seal. A perforation line ensure your clients can easily open to access the contents.

PRINTING

Personalisation of the Photoprotec is possible, contact us for a quotation.

COVERPLUS

STRONG AND DURABLE IN ALMOST ANY SITUATION

Coverplus are strong tamper evident envelopes which have a destructive peel and seal tape which ensures that what ever you are sending arrives in good condition and can be identified whether the goods have been tampered with during transit. Ideal for sending confidential documents, data discs and payments. With the strong fully opaque white exterior and black interior the contents are completely disguised and identifiable only by means of x-ray. Available in 3 recognised ideal formats. CoverPlus envelopes will not be damaged by rain ensuring your mail arrives in one piece.

APPLICATIONS

Perfectly suited for sending, payments, confidential documents, samples, financial documents or anything else which requires a strong tamper evident packaging.

MATERIAL

The Coverplus envelopes are made from a 70 micron thick COEX-LDPE.

SPECIFICATIONS

Flap with peel and seal destructive tape, white exterior and black interior completely non-transparent.

PRINTING

We can offer a printing service for the Coverplus envelopes, contact us for a quotation.

HRM & Salarisadministratie

Vertrouwelijk

Vertrouwelijk

BCS TAILOR MADE

By BCS HRM and salary administration – Privacy is a must!
Which is why our Coverplus envelope was choice number 1 for
sending of Salary slips through registered post.

The Coverplus envelope has a cream exterior and black interior
and is made from a coextruded LDPE plastic. The flap of the
envelope contains a tamper evident & destructive permanent
peel and seal tape which offers extra security and clearly shows
whether the contents have been tampered with.

With the addition of a color print, these are then easily
identifiable by the recipient.

POSTAL ENVELOPES

YOUR MAIL DELIVERED SAFELY

DaklaPack Postal Envelopes is the group name for our board backed envelopes, side gusset envelopes, paper bubble envelopes and cardboard envelopes. All of which offer optimal protection to your mail whilst still being able to fit through a letterbox. The tough sturdy envelopes ensure that your contents are delivered intact by absorbing the shocks, scuffs and bumps during transport. These envelopes are made from various sorts of paper and cardboard.

APPLICATIONS

With DaklaPacks Postal Packaging you can rest assured that fragile post arrives with the best possible protection. Suitable for one time use.

MATERIAL

Bubble Envelopes: Paper and bubble foil
Cardboard Envelope: Cardboard
Board Backed Envelopes: Cardboard

SPECIFICATIONS

Supplied with a peel and seal strip for easy trouble free sealing.

PRINTING

We can customise all of the envelopes above with your design. Contact us for further information and a quotation.

MEDICAL PACKAGING

SAFE AND RELIABLE

Safe and reliable packaging for use in the medical sector. When sending diagnostic samples by post you must follow the set guidelines in order to comply with EU laws. DaklaPack provides a specialised range which fully complies with international regulations. DaklaPack takes into consideration the importance of safety, ease of use and reliability of its medical packaging and similar products. We will be happy to help you find the right packaging for your specific purposes!

POLYMED

FOR MAILINGS BETWEEN TWO FIXED ADDRESSES

PolyMed mail wallets provide you with the ideal solution for mailings of diagnostic samples between two fixed addresses. The mail wallets are made of a strong flexible vinyl and can be used many times. The PolyMed mail wallets are easy to open and close by means of the reclosable contour with zip. Behind the transparent window there is room for an address card printed on both sides, so you do not have to keep typing or writing the same address. PolyMed mailing cases can be used in combination with Transport blisters, Safetybags and absorbent inlay films. PolyMed mail wallets fit perfectly into letter boxes, helping you achieve significant savings on postage costs.

APPLICATIONS

PolyMed mail wallets are suited for the sending of medical and diagnostic samples from and to doctors, hospitals, laboratories and patients. For rules and full packaging instructions for sending diagnostic material check www.daklapack.com and click on to medical.

MATERIAL

The PolyMed mailing wallets are made from a 0.35 mm flexible vinyl.

SPECIFICATIONS

The standard design is supplied with a window. Internal size of window 80 x 120 mm. Available in the colours red, green, blue, yellow and white. Other colours available from just 500 units.

PRINTING

PolyMed mailing wallets can be printed from just 500 units. Contact us for further information and a quotation.

POLYMED TAILOR MADE

With the PolyMed system from DaklaPack you have the best possible solutions for sending diagnostic specimens between 2 fixed addresses. Constructed from a strong vinyl 0.35 mm in thickness which can be used hundreds of times and easily opened and closed via the easy to use zip closure.

On the front of the PolyMed you will see a clearly visible transparent window, dimensions 80 x 120 mm. Insert your double sided address card into the window and pop the PolyMed into the post box, upon return the returner only needs to flip the address card and can easily send it back to you. No more labels and no more writing by hand. Suitable for letter post and complies to P650 guidelines.

ABSORBING MATERIALS

ABSORBS AND KEEPS THE LIQUID INSIDE THE PACKAGING

The absorbing materials offered by DaklaPack are part of our P650 range. In the event of a primary receptacle leakage the material absorbs the fluids which escape. The pads weighing 25 gram convert any leaked fluids into a solid substance and are exceptionally suitable for large diagnostic samples and medical waste. The absorbent material has one textured side and the reverse being a liquid-tight film, which means that the outside remains clean and dry.

ABSORBING SHEET FOR POLYMED >

ABSORBING MATERIAL FOR LARGE P650 PACKAGING >

APPLICATIONS

Part of packaging instruction P650. In the event of a leakage the material absorbs the fluids which needs to be kept inside the packaging. For rules and full packaging instructions for sending diagnostic material visit www.daklapack.com and click on to medical.

SAFETYBAGS

KEEPS LIQUIDS IN OR OUT

The Safetybag is fitted with an absolutely liquid-tight safety fastener. The packaging is made of strong transparent polyethylene and is guaranteed to keep liquid in or out. The bag is hermetically sealed simply by removing the covering strip.

APPLICATIONS

The Safetybag is most suitable as secondary liquid-tight packaging for, among other things, diagnostic samples of Category B. In combination with the Transport blister, the PolyMed mailing envelope and adequate absorbent material this combination complies with packaging instructions (see specifications). For rules and full packaging instructions for sending diagnostic material visit www.daklapack.com and click on to medical.

MATERIAL

Transparent polyethylene, thickness 70 micron

CLOSURE

Liquid-tight closure with peel and seal strip for trouble free sealing

PRINTING

Supplied as standard with usage instructions. Unique barcode numbering. Custom sizes and prints we would like to offer you on request.

SAFETYBAG TAILOR MADE

The Safetybag is the perfect solution for secondary leak proof packaging used for the sending of biological substances, Category B. The Safetybag can be used in combination with our Transport blister, MiniMailBox and absorbing material which will then meet the required P650 guidelines. The Safetybags are proved as with printed usage instructions, unique barcode & numbering with UN3373 symbol.

This particular Safetybag was made for one specific hospital with a unique colour which enables the laboratory to easily separate and direct to correct department resulting in an efficient sorting process.

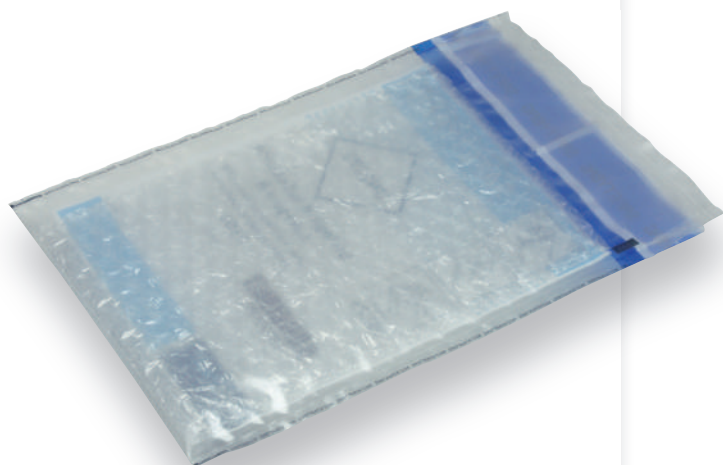

Should you have requirements for leak proof packaging then please feel to contact us.

PERSONAL SAFETYBAG

EFFICIENT AND SAFE STORAGE OF PATIENT POSSESSIONS

The Personal Safetybag is a vital attribute for the medical aid teams. It guarantees a correct and efficient way of working with regard to the storage and administration of the personal possessions of patients.

APPLICATIONS

The Personal Safetybag is intended for use by staff of the ambulance services and hospitals. Each department would record the unique storage number that is stuck to the top of the bag. This storage number corresponds, of course, with the number on the bag so that, at any time, it is possible to find out which personal possessions belong to which patient.

Safetybag

“ Unique and patented solution for sending of biological samples. The new design complies with all regulations and is delivered pre-assembled. ”

Tear notches for easy opening

3 Products
in one solution

The RigidSafetybag complies fully with EU packaging laws and is approved by the BVI (Belgium Packaging Institute). The RigidSafetybag is compiled from 3 main components, the fluid tight bag containing a rigid blister inside an absorbing pouch capable of absorbing the contents of a 25 ml tube should any leakage occur. The RigidSafetybag is delivered pre-assembled with the top open ready for use with containers or tubes. Easy to use peel and seal strip ensures a trouble free and quick liquid-tight seal perfect for sending biological samples Category B. The RigidSafetybag is suitable for one time use and easy to open by the recipient by means of an easy open tear notch saving time and without the need to use any additional items.

APPLICATIONS

For sending of biological samples, Category B. Such as blood or stool samples. Complete secondary packaging which complies to P650.

SPECIFICATIONS

The RigidSafetybag is a pre-approved liquid tight leak proof packaging solution complete with easy to use peel and seal strip. Complete with usage instructions and pre printed with required labeling. Approved by the BVI.

SNAZZYMED

SNAZZYMED POSTAGE SOLUTION

Developed with clinical trials in mind, or for any other purpose where patient or participant is required to return a diagnostic specimen. Easily filled through the side opening and sealed in seconds by using the peel and seal strip. Once received by the participant, the envelope is opened easy and effortlessly via the easy open tear notches and guided by a laser line perforation. Perfectly suited for elderly or handicapped patients as no additional tooling is required. A complete solution which is affordable, reliable and simple to use.

SNAZZYMED (TO ENVELOPE) >

SNAZZYMED (RETURN ENVELOPE) >

APPLICATIONS

The SnazzyMed postage solutions has been developed specifically for the purpose of sending home collection kits to patients or participants of screening programs. The envelopes are simple, light weight, UN3373 compliant and very easy to open requiring no additional tooling.

MATERIAL

Matte BOPP/LDPE 80 micron

SPECIFICATIONS

“TO” Envelope – Easy to open laser guided tear line (coloured) – 3 sides sealed opening on the short side. Peel and seal closure on flap. “RETURN” Envelope – easy to open by invisible tear notches, Peel and seal closure on flap, pre printed with UN3373 logo usage instructions in English, Dutch, French and German.

BODYBAGS

THE BODYBAG WITH UNIQUE FEATURES

The BodyBags by DaklaPack are new unique solution. Made by professionals for professionals. What makes our BodyBags different from the rest: strong construction, to be dragged easily, anti-static, ventilated and easily adjustable. Years of preparation and testing are now finally met with a complete new usable product.

APPLICATIONS

Transport of bodies in a responsible manor. For forensic use we have developed item (481330) which is supplied with a unique blue stripe.

SPECIFICATIONS

- Large format 2440 x 1300 mm, adjustable to 3 sizes with the unique hook and loop system
- On both sides fitted with a one way ventilating valve. Meaning moisture and air can be ventilated away from the corpse
- Plastic zip for flap , 2 zippers complete with large eye openings for secure sealing
- 4 handles on both long sides, so multiple people can carry the BodyBag
- For ease of use the BodyBag is supplied complete with a "H" on the end for "Head" and "F" on the other end for "Foot"
- Document holder for identification tags

MATERIAL

The BodyBags are made from white anti-static LDPE plastic

TRANSPORT BLISTER

BOTH PACKED AND SENT IN EXEMPLARY FASHION

Transport blisters are developed for sending of medical and biological substances and are made of strong polypropylene. The measurements of Transport blisters are carefully chosen so they fit perfectly in a PolyMed. The most of the Transport blisters can be used as letter post combined with outer additional packaging, which gives you a important discount on transport costs. You can use them together with a absorbing sheet and the Safetybags.

APPLICATIONS

Transport blisters are used for mailing medical and diagnostic research material: blood, feces, urine samples, smears, tissue samples and swabs. For rules and full packaging instructions for sending diagnostic material check www.daklapack.com and click on medical.

MATERIAL

The Transport blisters are made from 0,80 mm thick polypropylene.

SPECIFICATIONS

To be used with an outer packaging such as the MiniMailBox, Safetybag and absorbing material

LABELS

LABELS IN ACCORDANCE WITH INSTRUCTIONS

These Labels comply with the correct packaging instructions for the PolyMed mailing case or for the external packaging for the P650 (diagnostic sample UN3373). We can also make reversible mailing cards for the PolyMed mailing case. With these you can easily send back diagnostic samples simply by turning over the card behind the transparent window in the PolyMed.

APPLICATIONS

For rules and full packaging instructions for sending diagnostic material consult www.daklapack.com

SPECIFICATIONS

These Labels comply with the correct packaging instructions for the PolyMed mailing case or for the external packaging for the P650 (diagnostic sample UN3373).

PI620 / PI650 PACKAGING

FOR SAFE TRANSPORT IN ACCORDANCE WITH PACKAGING INSTRUCTION

The PI620 packaging is suitable for transporting or sending dangerous diagnostic samples and cultures of Category A and B. The packaging should consist of at least: green container, plastic shock absorber, one absorbent bag per tube and the cardboard box. For refrigerated transport or dry ice mailings you can additionally use an insulated box with associated cardboard box.

APPLICATIONS

For sending dangerous diagnostic samples and cultures of Category A which must comply with packaging instruction PI620. For rules and full packaging instructions for sending diagnostic material consult www.daklapack.com and click on to medical.

SPECIFICATIONS

UN-approved packaging for packaging instruction PI620 and PI650.

FECOTAINER

CLEAN, HYGIENIC AND PRACTICAL

The FECOTAINER® is a convenient and hygienic way to collect all forms of excrement. Well constructed, suitable for patients, nurses and laboratory technicians. FECOTAINER® is collapsible and fits through the letterbox (only 28 mm high) and can therefore easily be sent to patients. The plastic is recyclable and the included return bag is biodegradable. FECOTAINER® is CE marked and the lid acts as a seal to stop odours escaping.

APPLICATIONS

Convenient and hygienic method of collecting excrement, to be used by patients at home and in hospitals, nursing and care homes.

The FECOTAINER® is a patented product, CE marked, disposable one time use, flexible yet strong.

YOURINFLOW

SELF URINE FLOW TEST FOR MEN

YourinFlow is a unique innovative product, designed, manufactured and distributed by professionals. The disposable urine flow meter is easy to use in the comfort of your own home, hygienic and clean. The YourinFlow is designed for measuring accurately the maximum flow rates and volumes of urine for patients who pass with difficulty. The set consists of 3 disposable bags which are supplied with a monitoring window, reservoir with capacity level and a removable label with scratch system to easily record your results. User guide with easy to follow icons on the bag. Once complete the bag is easy to empty simply by holding above the toilet and releasing the spout on the bottom of the bag. Once empty the bag can simply be disposed of in your general house hold waste or recycled with plastics Category 7.

APPLICATIONS

For self testing of maximum urine flow for men with difficulty passing urine. For more information consult www.yourinflow.com

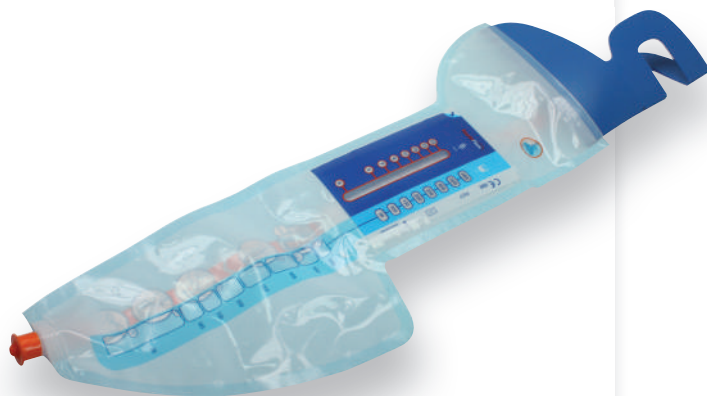

SPECIFICATIONS

Supplied with unique measuring window and removable label for recording results. Hygienic, clean one time use and completely disposable

SWABS

STERILE, RELIABLE AND HANDY

Swabs are guaranteed sterile-packed, so when they are unpacked there is no 'contaminating' material on them. This means they are 100% reliable for any kind of research involving the removal of human material. The pads of cotton-wool are attached to a plastic or aluminium steel made of rayon. If wished, they can be provided with a medium (carbon) for allowing bacteria and such to grow or else to inhibit bacterial growth. Swabs are available in a peel-pack or unbreakable tube.

APPLICATIONS

Swabs are exceptionally suitable for removing human material for research. Swabs are used for many studies and tests. For rules and full packaging instructions for sending diagnostic material consult www.daklapack.com

MATERIAL

The swabs are made from various materials: plastic or aluminium material: rayon.

ORDER NO	DESCRIPTION
----------	-------------

300200	Plastic swab in peel-pack
300251	Aluminium shatterproof tube
300261	Plastic shatterproof tube
300285	Plastic steel with carbon and black cap
300287	Plastic sterile swab with blue cap

TRANSPORT

ON TEMPERATURE AND IN MODULES

Many (biological) materials have to be transported or kept at a certain temperature. The TempShell elements and frames offer you a flexible solution for this. TempShell elements and frames can be used in special developed isolation bags or blueline boxes. The temperatures obtainable are: -30°C , -18°C , $+4^{\circ}\text{C}$, $+22^{\circ}\text{C}$, and $+37^{\circ}\text{C}$. Outer boxes for couriers or air transport can be tailor made.

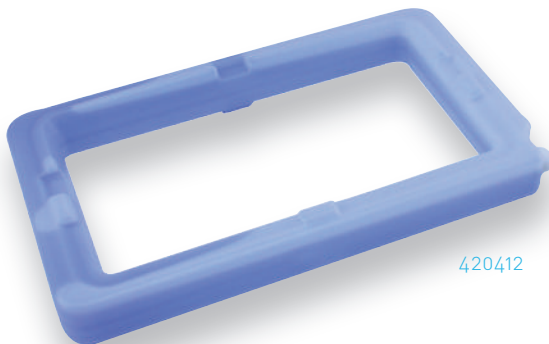

APPLICATIONS

TempShell elements and frames are very suitable for transporting and keeping biological substances, patient samples, blood products like packet cells and pharmaceutical products like temperature sensitive medicines or raw materials on required temperature.

MATERIAL

The TempShell elements and frames are made from strong HDPE plastic. Fluid contents: depending on the temperature and specific needs

TUBES / CONTAINERS

SAFE AND UNBREAKABLE

Containers and tubes are intended as part of the mailing packs for, among other things, feces, urine and blood. We also have wide-necked pots with a large opening for pathology.

The Biopost 777 is extremely suitable for mailing water samples as letter post. We also offer the opportunity to have the containers or tubes filled by us with liquids, such as formaldehyde.

APPLICATIONS

Suitable for packaging and transporting all kinds of diagnostic material. For regulations and full packaging instructions for mailing diagnostic material consult www.daklapack.com

MATERIAL

Both containers and tubes are made from polypropylene

DENTAL

THE BEST CHOICE FOR WORKPIECES USED IN DENTAL TECHNOLOGY

The Dental Carrier is the best Transport blister for dental technology! As well as good protection of workpieces used in dental technology, the Dental Carrier has many advantages for dental practice. All workpieces used are categorised per patient, so they can be clearly seen, are easily accessible, always ready and easy to store. This greatly reduces the chances of breakage, damage or loss. The Dental Carrier is made of polypropylene and consists of a hinged top and bottom with a flap fastener. The compartmentalisation has been optimally chosen. The external format is suitable for transporting one or more Dental Carriers in the popular plastic travel boxes. The membrane box is highly suitable for transporting several dental materials.

The foil inside the box will make sure the contents will stay in position. For the smaller dental materials we have an air membrane box.

APPLICATIONS

The Dental Carrier is a Transport blister for workpieces used in dental technology.

MATERIAL

Dental Carrier: thickness 1.0 mm, material polypropylene
Membrane box: polyethylene with foil as middle layer

SPECIFICATIONS

The Membrane box is completely transparent.

TABLETBLISTER

RELIABLE AND USER-FRIENDLY

The TabletBlister is a unique, user-friendly and reliable packaging with handy daily partitions. It is especially suitable for efficient packaging of tablets one week in advance. The tablets can be carefully sorted and apportioned at the chemist's for minimum risk of mistakes. The TabletBlister is fitted with a user-friendly protective adhesive film, making it easy to press in the compartment containing the day's tablet.

APPLICATIONS

The Tabletblister is most suitable for care homes with a large number of patients who has to take many tablets on daily and weekly basis.

MATERIAL

Our TabletBlisters are made from polypropylene.

SPECIFICATIONS

The TabletBlister is supplied complete with a sticker with detailed information.
